## The Registry Law.

The various registry agents in this county, and we don't know but throughout the State, have in past years given a very mild interpretation to Section 10 of the Act providing for the registration of electors. The Section reads as follows: "Any registered elector moving from one election district to another, prior to the day of the ensuing election, may apply to the registry agent before whom he has already been registered for that electoral year, at any time prior to the delivery of the certified copies of register to the Inspectors of Election, and have his name taken off the official register, and receive from the registry agent a certificate showing substantially that he was on a certain date duly registered in the official register of Township No. —, in the County of —, and that his name has been erased at his own request, etc." The definition given by Webster of the verb "to move" as used in this section is, "to change residence." This does not mean merely to come to the county seat to vote and enjoy the usual hilarities of election day, or to reap the benefits of the "sack" if there happens to be one, as registry agents have been in the habit of interpreting it. Residence is where one's home or settled abode is, and moving as used in Section 10 means a breaking up of said settled abode with a determination of residing elsewhere. That is the interpretation intended by the Legislature who enacted said law, and it is the proper one. The reason of the enactment of this law was to prevent fraud at election, and this granting of transfers indiscriminately is a downright evasion of the statute, and works harm by countenancing fraud. The object of the law is to compel electors to vote at home, where they are best known and known to have a right to vote or not, and then fraudulently, if attempted, can easily be detected. The spirit of the law has been heretofore evaded. Let the present registry agents see that the statute on this subject is strictly interpreted, and the Inspectors of Election should look to its enforcement.—Eureka Standard.

## Sayings of Men we Know.

Jake Klein—My beer did it.  
Major Garrard—The days of '49 (votes).  
Colonel Ellis—I gave it up at 10 A. M.  
John Sweeney—Where in h— was Garrard's league?  
J. W. Adams—Who will care for Garrard now?  
Judge Healey—The Gov. and I did it.  
Warden Bell—Those two ex-convicts weren't needed.  
Wells Drury—Will this racket increase the Ormsby candidates?  
Tim Dempsey—Wonder what all this cost?  
John Meyrle—I thought all the while I was the only man on the ticket elected.  
Charles Stoddard—I regard this result as favorable to the Pawning Senatorial interest.

## Fine Grass Country.

The Winnemucca Silver State says: Sheriff Fellows, who spent some days in Quinn River Valley, says the hay crop is good in that section, and there are some of the finest meadow lands he ever saw in the Valley. Hoppin Brothers have about 4,000 acres fenced, and Chas. McConnell, Jerry Hearn, Colonel Hardin, Ed. Mullaney and others have large areas of hay lands under fence. The valley is perfectly level for miles and is watered by Quinn river, which runs through it, and several mountain streams, which are used for irrigating purposes early in the season.

## Lake Tahoe.

It is rumored that a San Francisco capitalist will build one hundred cottages for the purpose of rental at the Lake next Summer. It is also said that the C. P. R. R. will build a railroad from Truckee to that point. This, with cheap fares from California, will make Lake Tahoe the best pleasure resort in the world.

## Fuss in Tennessee.

The Republicans are running Alf Taylor for Governor, the Democrats are running his brother Bob, and now the Prohibitionists are going to nominate their father for the same office. In the fuss there is a prospect of getting at all the secrets of the Taylor family.

## Reduction Works.

The Howell & Cary party, who recently incorporated, have purchased ten acres of land of the Kissick & Bailey on the river below the slaughter-house, as a site for erecting reduction works. The purpose of the projectors is to break ground and go to work. The ground purchased is one of the most valuable locations there is along the river. Water power almost unlimited will be easily obtained, and the proximity to the railroads is most favorable. These works when in operation will not only give a new impetus to Reno, but to all of Nevada. The prospector will take his pick and shovel and go to the mountains with confidence never before felt. If he gets ore he will have an assurance that with ore on his dump he will not have to go begging for a grub stake.—Reno Journal.

## The Blaine Campaign.

NEW YORK, Aug. 23.—The Portland, Maine, correspondent of the Tribune, says: The canvass in this State has not yet fairly begun on the part of either Democrats or Republicans, but preparations have been made for active work from Monday next to the day of election on September 13th. The formal opening of the campaign will take place at Sebago Lake on Tuesday next, when Blaine, Reed, General Gibson, of Ohio, and probably others will speak. As this will be Blaine's first political address since the canvass of 1884, a good deal of interest is shown in the event. Blaine will take an active part during the remainder of the canvass. The Republicans do not regard the State as in danger. The Democrats put their main reliance in the Prohibition canvass.

## Democratic Primaries.

The result of the Democratic primaries held thus far is as follows:  
Adams—Storey 26, Ormsby 7, Lander 9, Esmeralda 6, Elko 4, Nye 4, total 56. Churchill and Douglas will hold Primaries next Saturday, which will swell Adams' vote to 61. There will be 125 votes in the Convention, necessary to a choice, 63. A portion of Elko is to be heard from, also Eureka, White Pine, Lyon and Lincoln. Adams will probably get delegates enough from the counties named to swell his vote in the Convention to 75 or 80, thus insuring him the nomination. Winters has carried Washoe and Hardin Humboldt, and a few scattering votes in the different counties for both.

—Constipation, the curse of our life, Dyspepsia, our national disease and Rheumatism, which comes from acid stomach and from the sudden changes in our climate, are quickly cured by taking one or two Brandreth's Pills every night for a month. Persons are now living, enjoying most vigorous health who have taken one of these pills a night for over thirty years. Chronic diseases are cured by taking from two to four of Brandreth's Pills every night for a month. They purge away the diseased body. This you replace with new and healthy flesh prepared by an invigorated digestion from simple healthful food.

—The best medical authorities acknowledge the great value of Ayer's Cathartic Pills, and frequently prescribe their use with the utmost confidence, well knowing that they are the most effectual remedy ever devised for diseases caused by derangements of the stomach, liver and bowels.

—Do you wish a beautiful complexion? Then use Ayer's Sarsaparilla. It cleanses and purifies the blood, and thereby removes blotches and pimples from the skin, making it smooth and clear, and giving in a bright and healthy appearance.

—The State University at Reno will reopen on the 30th of the present month. It is expected that the attendance will be greater than ever before. Professors McCammon and Willis will have charge of the institution as before.

## What the Editors Say.

The following is from a lengthy article in the Sacramento Daily Record-Union:

"A striking example of the results of correct systems in business is found in what is known as the country order business of Sacramento. It would be exceedingly interesting to go into an elaborate description of the methods by which Weinstock & Lubin carry on a country order trade with hundreds of customers daily, but would take more space than can be given. It involves one of the most intricate, and yet one of the most harmonious systems of business known. This system insures the filling of an order far quicker than is possible by any other method. It is like a delicate but intricate piece of machinery, so adjusted that there is the least possible friction. When one wheel moves, the whole mechanism is operated. The result is as exact as is the case in a fine watch, which, while it may contain a hundred different parts, the relation of each to the other is such that, with the slightest movement of the mechanism, the result is marked instantly upon the dial. In the whole store are employed from 150 to 160 people, of whom the Country Order Department requires from 35 to 40. Through it there is scarcely any demand which the distant buyer can make that this house cannot fill. The house, though carrying the largest varied stock of varied goods upon the Pacific slope, is frequently called upon to fill orders for goods that it does not carry in stock; but it fills them all, never fails, and to do so has established relations with leading establishments in all lines of trade."

The lines of goods referred to in last few words of the above, and which we do not keep, are such goods as Agricultural Implements, Tobaccoes, Groceries, Stoves, etc. Orders for these goods are simply filled as an accommodation to customers. It is usually the case, however, that we are able to buy them for less than customers can when they buy direct.

Among our own lines of goods are—

Dress Goods,	Clothing,	Boots and Shoes,
Millinery,	Hats,	Trunks,
Domestics,	Notions,	Furnishing Goods,
White Goods,	Bicycles,	Silverware,
Neckwear,	Hammocks,	Draperies,
Underwear,	Baby Carriages,	Wraps,
House Supplies,	Stationery,	Fancy Goods.

Out-of-town orders filled with taste, care, speed and discretion.
